

CASE ERECTORS: DESIGNING THE PERFECT BOX

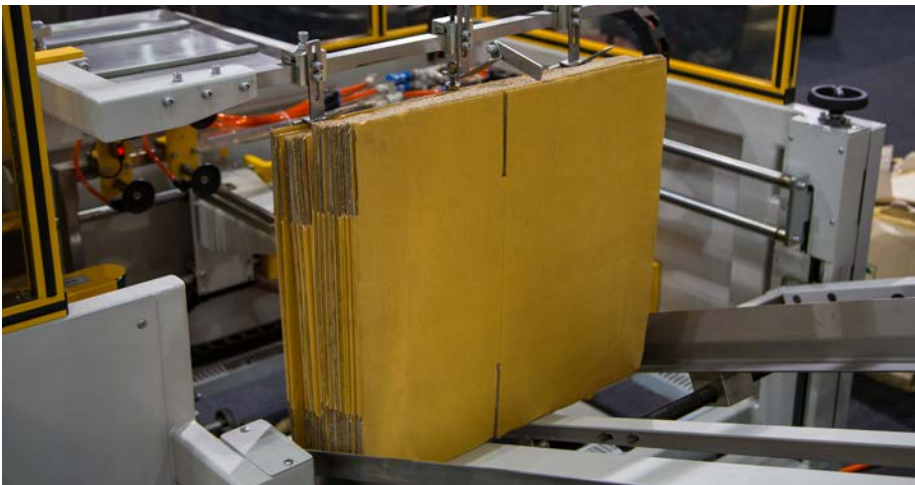

IS YOUR MANUFACTURER ASKING THE RIGHT QUESTIONS?

At American Box Company, we understand that in order to create the perfect design for your equipment, we need to ask the right questions. That's why when designing for case erectors and case sealers, you can be sure that we will be paying attention to those little details that will reduce downtime and speed up your assembly line.

THE DETAILS

- 1 Tapered Slots**
prevent catching when passing through machine
- 2 Shied Bottom Flaps**
removes potential of overlap when closed, resulting in consistently stable and upright boxes
- 3 Attention to Swing Direction**
print direction and panel orientation adjusted according to swing direction
- 4 Easy-Close Top**
saves steps and time and enables single-handed closing
- 5 Extended Glue Tab**
prevents catching when adding product
